

nanoCAD Construction Site

nanoCAD ConstructionSite is a specialized application that allows engineer easily develop a construction site plan and simplifies the planning and organization of the construction process. nanoCAD ConstructionSite is good at coping with both graphical and calculations tasks. Built using nanoCAD graphical kernel, nanoCAD ConstructionSite is a feature rich application that natively supports

nanoCAD Construction Site

nanoCAD ConstructionSite is a specialized application that allows engineer easily develop a construction site plan and simplifies the planning and organization of the construction process. nanoCAD ConstructionSite is good at coping with both graphical and calculations tasks. Built using nanoCAD graphical kernel, nanoCAD ConstructionSite is a feature rich application that natively supports

Features

-  Dynamic Standard and Custom Library Objects
-  Site Layout Design and Drafting
-  Road Construction, Detailing and Calculation
-  HDD (Horizontal Directional Drilling) with reports
-  Floor Plan Construction with Annotation
-  General CAD Platform (i.e nanoCAD Plus)
-  Powerful Parametric and Versatile Annotating Tools
-  Safety on site
-  Site Project Management
(i.e Job analysis, Cost analysis, Materials and so on)
